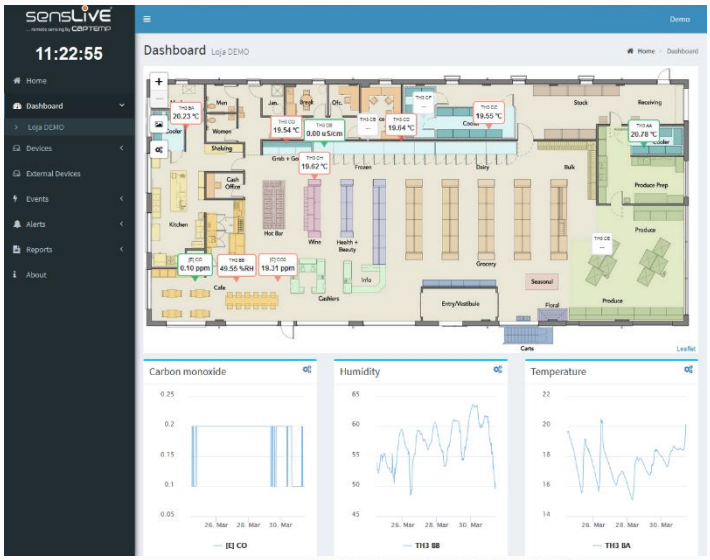
sensLIVE

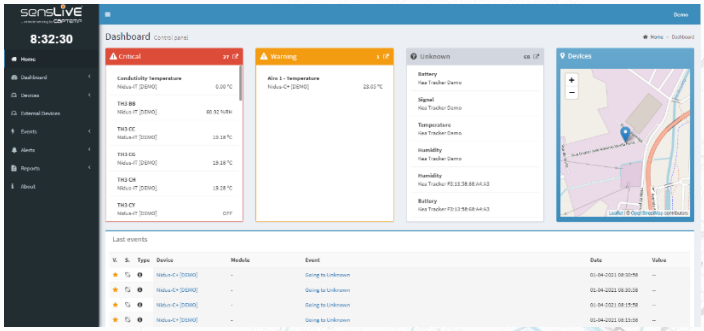
... remote sensing by CAPTEMP

Monitoring System

CAPTEMP®

smart device for smart solutions!





Environmental monitoring and remote-control

SensLIVE is a Web solution to store and track data from CapTemp devices.

Data collector and Gateway Nidus

Sensors

- Temperature
- Temperature and Humidity
- CO, CO2, NH3, CFC, etc. ...
- Counters (energy, water, gas, etc. ...)
- Weather stations
- Digital inputs (eg .: Intrusion, movement, etc....)
- Digital Outputs (eg. Buzzer, lights, etc. ...)
- Integration of all kinds of sensors over Modbus-RTU

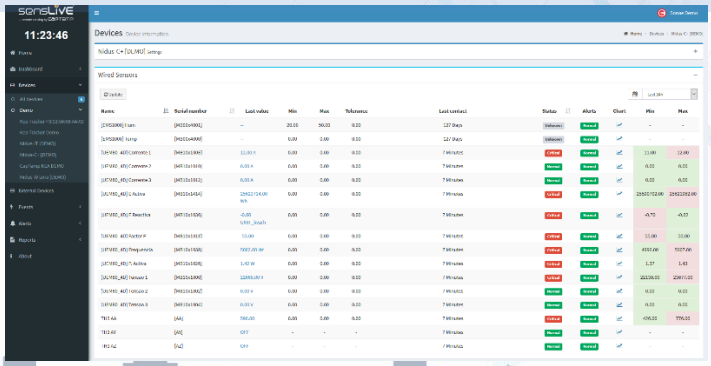
APPLICATION:

Where exists the need to monitor, register and control various types of sensors such as:

- Agriculture: Greenhouse management, irrigation systems, ...
- Industry: Food, Pharmaceutical, Hospital, etc ..
- Buildings: Security management, HVAC, Energy management, ...

Characteristics

- ☑ WEB platform with responsive environment
- ☑ User authentication with different profiles
- ☑ Events with direct or programmed reaction
- ☑ Creation and export graphs and listings (eg. PDF. CSV)
- ☑ Automatic calculation [MKT] in average temperature ranges
- ☑ Event validation
- ☑ Alarm generator through prebuilt templates
- ☑ Individual parameterization of alarms
- ☑ Automatic time zone adjustment for each user
- ☑ Internal Calibration System with programmed setting
- ☑ Automatic report generator
- ☑ Local management
- ☑ Customizable environment



Comply with:

FDA CFR 21 Part 11
Data Protection

FDA CFR 21 Part 203
Mean Kinetic Temperature (MKT)

CERDIFIED according:

EN 12830:2018 CERTIFIED

m 21
16-OC-1002/02

EN 12830 : 2018
(Temperature recorders for the transport, storage and distribution of temperature sensitive goods)

Welmec 7.2 2018 - Software Guide
(Measuring Instruments 2014/32/EU)
